Proposal: to eliminate smoking on campus

(Entire skit done in an 80's cartoon theme, overly dramatic, captain planet)

Open with Johnny fake smoking when Darrow and Macey walk by. Johnny blows smoke in their faces and they start coughing.

Student A: Ugh, I hate how many people smoke around here.

Student B: I know, me too. I don’t even think you’re allowed to smoke right here either.

Student A: I think you’re right. (To Johnny) Hey I don’t think you’re allowed to smoke here. Will you go to one of the smoking areas?

Student C: No I’m not going to move. You know nobody cares about the smoking policy anyway. I can smoke wherever I want to.

Student B: That’s just typical. I wish that somebody would do something about all the smokers on campus. It’s like the policy doesn’t do anything at all to stop them.

Student D enters as a ridiculous 80's superhero, like captain planet, but for smoking.

Student D: Hello I’m captain no smoke! I here you are having trouble with smokers around here.

Student A and Student B together: Captain No Smoke!

Student B: Can you really help us deal with all of these smokers?

Student D: I can, but only with you’re help!

Student A and Student B together: Okay!

Ryan: Good. Now smoking is bad for you because (Ryan says some of the stuff about health risks that he found)

Student C: Yeah everybody knows smoking is bad for you, but I’m not really a smoker anyway. I only smoke when I party or when I’m really stressed out like now with exams coming up.

Student A: You know I heard that there really isn’t a difference. I heard (Macey says something about perception vs. reality of smokers.)

Student C: Wow! I didn't know any of that. I guess I should quit, but it's really hard. I wish there was some way to make it easier.
Student D: You know I bet that it would be easier to quit if you had some sort of motivation. I've heard that there are a few studies that use money to motivate people to quit smoking. I think in some they paid people every few months when they didn’t smoke, and in another people put money into an account that they could only get after they hadn't smoked for a year. In both cases I think that there were more people who were actually able to quit than there would have been otherwise.

Student B: You're all right, and I think that we have the start of a new smoking policy for the campus. With a focus on getting this information out and helping people quit.

Student C: You know if we’re going to do all that we should probably do something about how the smoking policy on campus is enforced. (Johnny talks about enforcement procedures)

Student B: That’s a good idea. Alright kids are we ready to go help rid the campus of smoking?

Others together: Yeah!
